

Trays and Tray Sealers for your Culinary Creations

The CiMa-Pak Tray Sealer System includes trays, film and sealer. A complete package to seal in freshness and show off your food preparation for easy transport home.

It only takes 2 seconds to seal a tray!

We offer a **HUGE** selection of trays, **C-PET & A-PET**, for packaging meals for display or take-out!

Your foods will stay fresh longer when sealed!

Offer your customers the best quality in an impressive presentation.

All of our trays are:

Easy to open • Recyclable • Sealed trays are 100% leak proof

Prêt à Manger – for customers on the go!

Salads, Fresh Pasta & Desserts – keep your foods cold & fresh longer!

Trays

On the GO! C-PET trays are perfect for prepared meals – fresh or frozen – and are ready for reheating in a microwave or conventional oven.

Sealing each compartment separate from the other ensures the same excellent presentation from store to home.

C-PET trays:

- Temperature resistance from -40°C up to 200°C
- Shatter proof, knife and fat resistant
- Available in various sizes and designs in black or white
- Contents are hermetically sealed – ideal for freezing and transport

A-PET food trays are designed specifically for delicatessen and cold food.

The A-PET material's high clarity enhances the presentation of the product. Sealing the trays airtight with an anti-fog lidding film **will keep cold foods fresh, longer.**

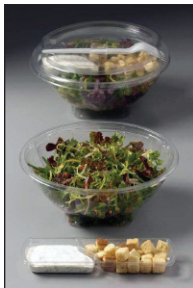

A-PET trays:

- Suitable for temperatures between -40°C up to 60°C
- Ideal to create optical highlights in the display cabinet: 100% clear A-PET
- Two (2) closure options for most trays: Showcase lids or sealable with clear film
- Sealable under modified atmosphere (MAP)

2 seconds to seal freshness in to take home!

**Attention high volume producers!
Take advantage of an even larger selection of trays*!**

A myriad of trays are available in **C-PET for prepared or frozen meals.**

A-Pet trays, with or without lids, for cold foods and snacks.

Discover a wide range of **bowls.**

Fresh **meat trays** available in various colours.

*Minimum orders required.

C-PET Trays – always in stock

CiMa-Pak Tray Sealers

Now that you have chosen the most suitable tray to present your culinary creation, let us help you choose the best tray sealer to preserve it.

Tray Sealers available as: **seal only** – **seal and die cut** – **vacuum, seal and die cut**

The perfect solution for take-out and ready-to-eat foods!

CiMa-Pak Tray Sealers - Seal only

The **CiMa-Pak tray sealing system** is the ideal packaging system for both cold and warm food. The trays are sealed with a clear, antifog, peelable polyester film that provides an airtight and spill-proof seal, separating each compartment of the tray, making it ideal for take out. The sealed tray will **keep your food fresh longer** and enhance the presentation.

CiMa-Pak Tray Sealers - Seal and Die Cut

The **CiMa-Pak Tray Sealers** with die cut are ideal for sealing round trays or any other tray where a die cut edge is required or preferred.

SR230

SR430

Rapida

Features of the CiMa-Pak Die-Cut Tray Sealers

All die cut sealers come with a die—custom-made for your choice of tray. You can choose from our wide selection of both stock and non-stock trays.

SR230 – This machine is a small, manual tabletop tray sealer—ideal for any small take-out kitchen or wholesale supply. Seals 1 tray at a time.

SR430 – This is a larger version of the SR230 and can manually seal up to 6 trays per die depending upon the tray size.

Rapida and Rapida Plus – This semi-automatic tray sealer is activated by push button. Both models seal and cut the film to the contour of the trays by pneumatic piston. The Rapida has one die only while the Rapida Plus has the added advantage of changing the die to seal other trays.

Technical data	SR230	SR430	Rapida

CiMa-Pak Tray Sealers - Automatic Vacuum, Seal and Die Cut

The **CiMa-Pak TPS 1000** is designed for packing food products with modified atmosphere in pre-formed trays. This machine is easy to operate with step by step programming on a touch screen. It is easy to clean with easy access to the entire machine by opening one hood. The tray moulds can be changed without tools because of the unique easy mould change system. This machine has a fully automatic sensor control which ensures an accurate vacuum process and injection of a preservative gas to a set atmosphere.

The **CiMa-Pak TH 4200**, made entirely of stainless steel, is a cost and labour saving thermo former, forming its own trays. Its compact design offers versatility and efficiency. It uses heat to transform film into a variety of tray shapes. Once the tray shape is made, food is placed into the just-formed tray and moves along to be top sealed—with or without the optional gas flush. This machine requires minimum maintenance and comes equipped with a built-in vacuum pump. It has sensor controlled packaging and safety guards conforming to CE-regulations.
